Informatics Engineering graduate from Kwik Kian Gie School of Business with a strong interest in DevOps, cloud infrastructure, and system automation. Experienced in developing and deploying backend services and cloud-based applications through academic projects, internship experience, and the Bangkit Cloud Computing program. Familiar with Google Cloud Platform (GCP) and modern deployment practices.

EDUCATION

Bachelor of Computer Science Kwik Kian Gie School Of Business	Oct 2022 - Apr 2026 GPA: 3.87 of 4.0
- Awardee PT. Adaro Indonesia Scholarship 2023/2024, 2024/2025. - Actively participated in the Google Solution Challenge 2024. Link certificate. Link to graduation certificate. Link to the transcript grades	

WORK EXPERIENCE

Artificial Intelligence Project Intern PT. Salam Pacific Indonesia Lines	Feb 2025 - Aug 2025 Jakarta
As an AI Project Intern at Salam Pacific Indonesia Lines (SPIL), I contributed to the company's digital innovation initiatives by supporting the development and implementation of technology-driven solutions to enhance operational efficiency and business performance. Key contributions:	
- Implemented automation solutions that improved operational efficiency by 30% and streamlined key business processes across departments. - Created a web-based dashboard using Next.js, enabling real-time monitoring and cost estimation to improve decision-making efficiency by 25%. - Integrated Flask-based REST APIs connected to a PostgreSQL database, enabling structured data management across business units and resulting in a 40% increase in development speed for future projects. - Collaborated with multiple business units to gather requirements, align expectations, and deliver solutions on schedule.	
Cloud Computing Cohort Bangkit Academy by Google, GoTo, Tokopedia, Traveloka	Sep 2024 - Dec 2024 Jakarta, Indonesia
As part of the independent study program at Bangkit Academy, led by Google, Tokopedia, Gojek, and Traveloka, significant development has been achieved in both soft skills and hard skills, particularly in cloud computing technologies, with a focus on hands-on experience and operations on Google Cloud Platform. Below are some key achievements during this program:	
- Top 5 students with the highest interaction during Weekly Consultations: Consistently engaged in group discussions, asking questions, sharing insights, and providing feedback related to the ongoing program. - Key team member who completed the individual final project worksheet on time: Demonstrated strong time management skills and completed the final project worksheet within the given deadlines. - In-depth understanding of cloud computing concepts: Gained comprehensive knowledge of cloud computing, including storage, databases, and other cloud-related services. - Proficiency in using cloud computing services: Gained hands-on experience with Google Cloud services, including Compute Engine, App Engine, Cloud Run, Storage, and more. - Completion and presentation of the final project: Delivered an effective presentation of the final project to judges and peers. Link certificate. Link to the transcript grades.	
Sales Promotion Boy League Indonesia	Jun 2023 - Jul 2023 Jakarta, Indonesia
Managed inventory of League shoes in main booth, resulting in a 20% reduction in stock discrepancies.	
Sales Promotion Boy League Indonesia	Jun 2022 - Jul 2022 Jakarta, Indonesia
- Promoted products and engaged potential buyers. - Increased product sales by IDR 150 million during the Jakarta Fair employment period.	
Merchandiser PT. Frisian Flag Indonesia	May 2021 - Aug 2021 Jakarta, Indonesia
- Managed inventory of products delivered to retail stores and supermarkets, ensuring timely stocking and replenishment. - Created a comprehensive report detailing products and distribution statistics. - Sold up to 40 cartons of UHT milk, resulting in a 20% increase in sales.	

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

Head of Finance & Logistic Division Informatics Community	Oct 2023 - Oct 2024 Jakarta, Indonesia
- Prepared logistics for events and ensured readiness for smooth execution. - Assisted treasurer in collecting finances from internal and external sources, resulting in a 20% increase in funds raised.	

Member	Oct 2023 - Oct 2024
Google Developer Student Clubs IBIKKG	Jakarta, Indonesia
- Participated in study jam sessions focused on mobile programming using Flutter, contributing to the completion of 100%. - Participated in 10 events including info sessions, workshops, tech talks, and collaboration events to expand knowledge and network within the industry. Link certificate.	
Mobile Legends Player	Oct 2022 - Oct 2023
KSB E-Sports	Jakarta, Indonesia
- Led the team as a gold laner in KSB SHU team, resulting in a 20% increase in team wins. - Contributed to the organization's success by securing 5 certificates in the tournaments. Link certificate.	
Usher	May 2023 - May 2023
Badan Koordinasi Penanaman Modal (BKPM)	Jakarta Indonesia
- Informed guests about activity, provided guidance, addressed needs, and shared information. - Enforced event rules and relevant health and safety regulations, resulting in a 20% decrease in incident.	

PROJECTS

JaHub 	Feb 2026 - Mar 2026
Developed JaHub, an Android-based application designed to support family harmony by helping married couples manage shared schedules, reminders, and important moments in daily life. The application was built using Flutter, Dart, and Firebase with a focus on improving communication, coordination, and relationship support between partners. - Designed and developed reminder and shared agenda features to help couples organize daily activities and important events collaboratively. - Implemented real-time data management and authentication using Firebase to ensure synchronized and secure user experiences. - Applied the Extreme Programming (XP) development methodology, including planning, iterative development, testing, and user-focused evaluation throughout the project lifecycle.	
Boolah 	Jun 2025 - Jul 2025
A web based sports field booking platform designed to streamline the reservation process by enabling users to check real-time availability and make bookings online, while providing an administrative system for efficient schedule and booking management. - Developed the user interface for the booking system. - Integrated APIs to handle booking and availability data. - Created presentation slides to explain the application. - Wrote detailed documentation of the system in a structured report.	
Dapur Fantastic 	Jun 2025 - Jun 2025
Dapur Fantastic is a modern web based recipe application designed to help users discover recipes and cook with ease. The platform allows users to search for various dishes, view detailed step-by-step cooking instructions, and receive intelligent recipe recommendations based on the ingredients they have available. By integrating AI capabilities, the application enhances user experience by providing personalized and practical cooking suggestions. - Designed and developed the user interface to ensure a clean, intuitive, and user-friendly experience. - Integrated and fetched data from the Gemini API to enable AI-powered recipe recommendations. - Conducted testing to ensure all features functioned properly and delivered a smooth user experience.	
Allergify 	Oct 2024 - Dec 2024
A capstone project utilizing AI-based OCR technology to scan and analyze packaged food labels, helping users detect allergens and make informed decisions. As the team leader, I coordinated efforts across machine learning model development and deployment, UI/UX design, and testing, ensuring the successful delivery of the project. Designed to enhance food safety and provide a seamless experience for individuals with spesific allergies. - Defined target users and created a detailed user persona for the application. - Develop a project plan outlining the scope and vision for the application. - Conducted cost estimation to related to the resource required by the application. - Develop backend APIs using Node.js and Express.js. - Managed application data using Firebase Firestore (NoSQL), ensuring real-time synchronization between services. - Built Flask API to integrate and consume machine learning models. - Conducted functional and regression testing on REST APIs using Postman, documented bug reports, and verified fixes prior to cloud deployment. - Deployed backend APIs using Google Cloud's App Engine, and deployed Flask APIs using Cloud Run. - Prepared a project brief detailing the application's objectives and goals.	
planT 	Dec 2023 - Jan 2024
A Hackfest project with rank #54 of 693 Teams also Google Solution Challenge project, planT aims to address the challenge of optimizing plant growth and crop yield through a user-friendly mobile application. - Created a User Pesona for application. - Created UI / UX using Figma for planT.	

SKILLS

Operating Systems: Windows, Linux.

Programming Language: HTML, CSS, JavaScript, PHP, Java, Python, Dart, C#, Go.

Containerization and Orchestration: Docker, Kubernetes.

Frameworks: Flutter, Tailwind, React JS, Express JS, Hapi, Flask, Angular, Codelginter.

Soft Skills: Adaptability, Problem-solving, Verbal and Written Communication, Teamwork, Critical Thinking, Time Management, Growth Mindset, Project Management, Energy Management, Resilience.

Tools and Technologies: Visual Studio Code, Android Studio, GitHub, Google Cloud Platform, Postman, Firebase, Node js, Netbeans IDE, Figma, Enterprise Architect, XAMPP, WebStorm, Notion, Trello, Jira.

LANGUAGES

Bahasa Indonesia (Native proficiency) • **English** (Limited working proficiency)

AWARDS

Top 50 Teams in Google Solutions Challenge 2024

Participated in the Google Solutions Challenge 2024, where our team ranked among the top 50 out of 693 teams globally. We developed innovative solutions by creating an app called planT to address real-world problems, achieving recognition for our performance.
